

LPXCM - 50" - 150" TRACK LIGHTING CABLE EXTENSION KIT

TRACK FIXTURE ACCESSORIES

SPECIFICATION

Application: For extending track lighting via Aircraft-grade cable from ceiling plane. LITON Cable Suspension Kits feature outstanding strength using 1/16" galvanized steel cable and great accuracy with the self-locking adjustable cable gripper. These kits speed installation and simplify future adjustments.

Mounting: Suitable for Sloped/Angle Ceilings. Multiple Options available for T-Bar, Jbox and Panel Mounting. Available 50" and 150" Max. Lengths. For custom lengths, consult factory.

Simply set the track to the desired height and the gripper locks the cable into position. The cable gripper is a unique, self-locking suspension device. The gripping mechanism is spring loaded and allows the gripper to unlock so that the cable length can be easily moved up or down as needed.

Perfect for suspending pattern layouts and are ideal for retail and commercial applications as they blend seamlessly into the environment by giving the feel as if they floating in air.

Canopy Type: Available in 5" T-Bar Mount (No Power Feed), 2" Round Ceiling Panel/Drywall Mont (No Power Feed) and 5" J-Box Mount & Power Feed.

Finish: Available in Black and White.

Cable Length: Available in 50" and 150".
